This up-to-date and comprehensive set of two CD-ROM discs provides a superb collection of authoritative documents on the subject of living wills and advanced directives. What kind of medical care would you want if you were too ill or hurt to express your wishes? Advance directives are legal documents that allow you to convey your decisions about end-of-life care ahead of time. They provide a way for you to communicate your wishes to family, friends and health care professionals, and to avoid confusion later on. A living will tells how you feel about care intended to sustain life. You can accept or refuse medical care. There are many issues to address. This compilation of documents includes the VA guide, Your Life, Your Choices - How to Prepare a Personalized Living Will, Planning for Future Medical Decisions, Choices about Death and Dying. For patients, practical information is provided in clearly written patient education documents. For medical professionals, doctor reference tools and texts have detailed technical information and clinical background material. There is no other reference that is as fast, convenient, and portable - everything you

need to know, from the federal sources you trust. This thoroughly researched collection presents vital information from many authoritative sources: Food and Drug Administration (FDA), Centers for Disease Control (CDC), National Institutes of Health (NIH) and others. In addition to the comprehensive disease-specific coverage, this disc set also includes our Medical Encyclopedia, a \$19.95 value!
