Mark D. Schuman Esq., Sarah M. Stensland Esq. : A Guide to United States Patent Litigation before purchasing it in order to gage whether or not it would be worth my time, and all praised A Guide to United States Patent Litigation:

0 of 0 people found the following review helpful. An efficient overviewBy Jonah ProbellAn informative basic overview of the federal court system and trial process with particular respect to patents, this booklet wastes no words. However, the subsection on 101 needs a refresh post-Alice. The subsection on 102 needs a refresh post AIA. A new

section on inter-partes review would help to complete the reader's understanding. I hope to buy several copies of an updated edition to give to interested novices.

United States patent litigation is complex, lengthy and expensive. It can be daunting for both those unaccustomed to litigation, as well as large domestic corporations experienced in filing and defending lawsuits. This guide provides the reader with a better understanding of the US judicial process, particularly as it applies to patent law, including sections on the US court system, its rules and its procedures, and the time and cost involved in US patent litigation. For patent litigants, the guide will provide a better understanding of an attorney's role in the process and where expenses are generated, which will allow them to make more informed business decisions related to litigation.

About the Author Mark D. Schuman and Sarah M. Stensland are lawyers at Carlson Caspers, a Minneapolis-based law firm known for its excellence in intellectual property litigation and counseling. Mark's practice encompasses contested matters in the United States District Courts, state courts and administrative agencies. Mark has participated in numerous district court trials to both the bench and jury on matters related to patents, trademarks and other intellectual property rights. He also has participated in numerous Markman hearings. Mark obtained a temporary restraining order and seizure order against a Taiwanese company. He also has headed ANDA litigation over the drugs Prilosec, Protonix, Zantac oral solution, Axert, and Nitro-Dur. Sarah practices intellectual property law with a focus on patent litigation. She represents clients in patent infringement actions, with an emphasis on defending generic pharmaceutical companies in Hatch-Waxman litigation (also referred to as ANDA litigation). In addition, Sarah has represented clients in traditional patent litigation and trademark infringement matters. Sarah regularly participates in the development of litigation and settlement strategies, depositions and discovery, and preparation of witnesses for trial. As a lawyer and chemical engineer, Sarah has a solid command of her clients' technologies and helps companies understand and protect the full market value of their products and processes.
