**John James Ph.D : A Sea of Broken Hearts: Patient Rights in a Dangerous, Profit-Driven Health Care System** before purchasing it in order to gage whether or not it would be worth my time, and all praised A Sea of Broken Hearts: Patient Rights in a Dangerous, Profit-Driven Health Care System:

4 of 4 people found the following review helpful. A Profound and Illuminating Evaluation of American HealthcareBy

Liliana Gonzalez The latest research indicates that medical errors are the third leading cause of death in the U.S. As a former RN, I could not put this book down! I learned a great deal about cardiology while reading a book that seemed like a compelling mystery novel. Many of my acquaintances think I am a good story-teller when I relay insights about what goes on behind the scenes in hospital settings. Dr. James validated much of what I have been preaching through the years about the need to take ownership of your own health and healthcare. Blind submission to authority is dangerous. And when blind obedience is given to those with medical "authority," the results can be deadly. Read this book to get ideas about how to navigate your way through our healthcare system. In short, if you or a loved one can't avoid going into a hospital or clinic, this book will give you tangible tools to help you get out ALIVE! 0 of 0 people found the following review helpful. for safety in .Medicine By Amelia an excellent book. Mr James is a true advocate for safety in the medical profession and leads the fight for safety every day. 0 of 0 people found the following review helpful. Protecting the ones you love by asking questions and keeping informed By judy hinch very informative book on cardiac issues and how it is necessary to carefully follow and question a doctor's actions when someone you love is ill

This is a must-read for summer runners, baby-boomers, and anyone who suspects that they or a loved one has been harmed by medical errors in our health care system. Hundreds of thousands of Americans die each year from medical errors, but most mistakes are kept secret from patients. After learning a few basic tools of cardiology, the reader shares a journey of heartbreaking mystery and discovery as a father pieces together the events that led to the death of his 19-year old son, despite extensive evaluation by a "team" of cardiologists. That personal struggle opens into a broad-ranging examination of our profit-driven health care system. The story concludes with an appeal for ten patient's rights to protect us all before we personally encounter the dangers of our health care system.

About the Author The author is a medical scientist with 2 Master's degrees and a Doctor of Philosophy in pathology. He is a board-certified toxicologist working in the space industry to solve environmental health problems for future journeys of humans to the moon and to Mars.
