My grandson is a Lawyer and loved it.By Joseph BennettI gave this book to my grandson before he left me for college. He's always been such a good boy and, following in his late father's footsteps,

he wanted to become a lawyer. When he finally got around to calling me from his dorm he said the book I gave him was very helpful and he loved me very much. I haven't read the book myself, but my grandson said it was nice and that he loved me so I sent him more money for additional books.

This is a friendly and helpful companion for clinical students and new lawyers as they venture forth. In 115 pages, the book covers topics from solving problems and telling stories, to coping with lies and mistakes, interviewing and counseling clients, investigating and negotiating cases, writing legal memos, making oral arguments, trying lawsuits, and other necessary lawyering skills. Kenney Hegland introduced many to legal education with *The Study and Practice of Law in a Nutshell*. Paul Bennett is a well-known clinician. this title is a wonderful review of the trees and a needed overview of the forest. Its quite readable: short and happy, quick and funny.
