This seminal book presents a fundamental reconsideration of modern American administrative law. According to Christopher Edley, the guiding principle in this field is that courts should apply legal doctrines to control the discretion of unelected bureaucrats. In practice, however, these doctrines simply give unelected judges largely unconstrained and inescapable discretion. Assessed on its own terms, says Edley, administrative law is largely a failure. He discussed why and how this is so and argues that law should abandon its obsession with bureaucratic discretion and pursue instead the direct promotion of sound governance.
