Lawrence M Friedman : American Law an Introduction Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised American Law an Introduction Edition:

0 of 0 people found the following review helpful. Great book, well written and structuredBy Alberto Bello GarciaGreat book, well written and structured. There is a narrative linked to the 20th Century's US history (economic cycles, civil rights and liberties, globalization), that makes it very readable.0 of 0 people found the following review helpful. Four StarsBy CustomerThanks..0 of 0 people found the following review helpful. Five StarsBy CustomerA

awesome book and a great deal!

This is a comprehensive introduction to the American legal system for students and general readers. The book uses anecdotes, historical detail and scholarship to describe the variety of American laws, from antitrust to tort law, and explains how these laws are made and how they are administered. Taking account of important cases and legislation, the book explores the way changes in American law mirror and sometimes prompt changes in American society.
