Brett R. Turner, Laura W. Morgan : Attacking and Defending Marital Agreements before purchasing it in order to gage whether or not it would be worth my time, and all praised Attacking and Defending Marital Agreements:

Focusing on upon the twin legal issues of validity and construction of marital agreements, this carefully researched book offers an in-depth consideration of what happens after the agreement is signed by the two parties. In this book Brett R. Turner and Laura W. Morgan, both well-known legal researchers, explore the strongest arguments the lawyer can use that will result in the most significant benefits for their client, as well as offering drafting tips when

appropriate. They provide guidance to the family lawyer faced with making and evaluating arguments on the validity and construction of marital agreements, supported by their extensive case law research. They demonstrate how identifying and making the best argument possible can result in a result that substantially benefits the client and avoids potential problems in the drafting process. Noting the types of provisions that tend to cause problems in court, they also include a mini-encyclopedia of ambiguous marital agreement provisions and discovery materials on the validity of marital and antenuptial agreements that pave the way for further research.

About the Author Brett R. Turner is a Senior Attorney in Family Law with the National Legal Research Group (NLRG) in Charlottesville, Virginia. Laura W. Morgan is owner and operator of Family Law Consulting, in Charlottesville, Virginia, which provides appellate argument and brief writing to family law attorneys nationwide.
