Before It's Too Late BookBy CustomerI decided to purchase this book because there was a sudden passing in my family and it showed me that I needed something like this to record important information. You do not realize the information that you can overlook. Yes I have all of my insurance documents in order, a will, a health directive, a safe deposit box that two others can access, a beneficiary for my bank account. I didn't think of writing down passwords, the lock code to my phone, who is going to care for the pets, where I would like to be buried and tons of other things that I just didn't think of. I highly recommend this book. The book my aunt had didn't cover half of the items that this book does.0 of 0 people found the following review helpful. Better then your will!By Nana MamaThe book looks good and it will contain a lot of details for my family. It was the best

one I found for the price andTo leave instructions for my final wishes. I have not started to use it yet but I think it will work out just fine.Shipping was quick.5 of 5 people found the following review helpful. Do this before it is too late!By LindaIf you love your family, you will want to have information handy for them in the event of your death. How many credit cards do you have? Where is your bank account? Do you have an IRA? Investments? Will? Living Will? They will need all kinds of information. Be kind to them and use the book which will take some of the burden from them when you die.

A new workbook, *Before It's Too Late*, will help you create a complete record-keeping journal. This easy-to-fill-out book takes you through a simple step-by-step process of recording your vital information pertaining to financial investments, insurance policies, personal property, will and trusts, employment history and benefits; names and phone numbers of legal and financial advisors, final arrangements for funeral services, obituary and disposition of remains. When it is completed, you will have an estate and funeral planning guide that will give your family the ability to fulfill your written instructions. Your loved ones will have peace of mind knowing that they are making the right choices, strengthening their ability to cope with the big decisions and small details of your death.

From the PublisherChances are, you have prepared your will and have put it in a safe place. You have probably designated a family member or friend to be the executor of your estate at the time of your death. You may even have shared your funeral plans and wishes with those close to you. If so, you may be feeling well organized in the event of your death, but guess again. Most of the important information about your personal affairs is kept in your head. Not just the big details surrounding your financial estate, but the small details that you don't realize are important. After you're gone, who could quickly find the answers to questions concerning: location of the will, letter of instruction, other important documents and keys; financial assets such as investments, banking, insurance policies, real estate records; phone numbers of the attorney, insurance agent, accountant, clergyman etc.; employment history and retirement/pension benefits; vital information needed for the death certificate and obituary. How will your heirs know that they have taken care of all your personal affairs according to your wishes if you haven't written everything down? If you are unsure of how to get started, a new workbook called *Before It's Too Late: Don't Leave Your Loved Ones Unprepared* will help you create a complete record-keeping journal. This easy-to-fill-out book takes you through a simple step-by-step process of recording a wide range of personal information. When it is completed, you will have an estate and funeral-planning guide that will give your family the ability to fulfill your written instructions. Millions of dollars in life insurance policies, bank accounts and safe deposit boxes go unclaimed because heirs are unaware that those assets exist. One section in *Before It's Too Late* includes a complete record of your legal and financial affairs. Your executor can rely on this record to avoid leaving assets unclaimed. In addition, this information will reduce the lawyer's time and fees when settling your estate. Many people assume that when they die, their family will know what specific funeral plans to make. But under the stress of making difficult choices in an emotional situation, family members can disagree or feel guilty about making wrong last-minute decisions. *Before It's Too Late* creates a complete funeral plan for others to follow by recording your final wishes. Your family will have peace of mind knowing that they are making the right decisions, strengthening their ability to cope with your death. There are lots of reasons why you may have put off discussing the details of your death with people closest to you. Maybe you mean to talk to your relatives who live out-of-town but never remember to do it. Maybe, as a single parent, you think your children are too young to deal with the thought of your death. As the son or daughter of aging parents, you may feel awkward about asking them about their financial assets or funeral plans. The act of confronting death on paper is not easy but it is simple. *Before It's Too Late* provides a way to share your important information and wishes on paper with those who will be responsible for the big decisions and small details after you are gone. There aren't many other things that you can do for your family that will help so much and cost you so little. Single, married, divorced, or widowed, no matter what your age or situation, don't leave your loved ones unprepared.
