A highly recommended reading, especially to those who are only contemplating ...By Tatiana Neroni The book, in addition to exposing, in detail, judicial corruption as it unfolds against any critics of judicial misconduct, especially if such a critic happens to be an attorney, offers a detailed analysis of how federal courts filibuster civil rights cases, and specifically addresses one of the main tools of such filibustering: the Rooker-Feldman doctrine. An honest account, well written, the topic is under-presented to the American public by

the legal profession out of fear of retribution from judges since the judiciary control law licenses, and thus reputation and livelihood of attorneys in this country. A highly recommended reading, especially to those who are only contemplating to obtain legal education and start practicing law for a living. 5 of 7 people found the following review helpful. A must read for Lawyers and the gullible public that has misplaced its trust. By Chris D. This is quite frankly a very scary book to read. The author, who clearly knows her stuff is the first to really expose the major inadequacies in our Judicial system. This is the Serpico of law. Unfortunately the organized institution that passes for justice and law is so controlled, so corrupt, and so unbelievable, ...I wish all of us luck with our corrupt and capricious system. Kudos to her for stepping out with this information. This was a very brave act. And this book is currently underappreciated. Unfortunately I don't think the American public is ready to fully grasp the depth and scope of this corruption and malaise. Too many want to believe that our system is unfaillable and just, ...it isn't. 1 of 6 people found the following review helpful. I want to be a judge someday! By Reader for Life The book is awesome! She starts by giving a historical overview of the judicial system before it became what it was today. I am anxiously awaiting book two; which is due out soon. Barbara C. Johnson hits the nail on the head where it concerns a visual on what to expect when defending yourself. Another thing is that if you want to hear more from this author and her expert opinion on these matters, google the cps chronicle nationwide news, she's on every wednesday and saturday night. You can catch her on live as she answers your questions and offers clear and concise answers to your legal questions. She's on Blog Talk Radio and I can only affirm that she's the best; I wish every attorney was like Barbara, she is a hidden gem to a society of lawlessness. Check out the book and meet the lady behind the Black Robe! Get the book, keep it on your coffee table, everyone needs to read it and learn the laws of the land. It can protect you or prevent you from making innocent mistakes in life that can measure up to a fatality in legal costs.

Behind the Black Robes: Failed Justice /is about a very serious problem, the need for court reform and the abolishment of judicial and quasi-judicial immunity. Marinated with the makings of sizzle, the book is filled with the courts' tricks and traps for the unwary---to alert the readers both why their law cases failed and what must be done to effect court reform. Each chapter introduces the background of the subject of that chapter and then presents a series of illustrative anecdotes intended to teach the readers by example how to avoid those court tricks and traps people are likely to encounter in their existing or potential court cases.

About the Author Johnson lives life her way. An unconventional 74-year-old, she has long been a fierce advocate for fathers' rights in family courts. She is an outspoken critic of the Massachusetts court system, which she says is rife with corruption. In 2002, she ran a quixotic campaign for governor, campaigning in an antique fire truck and promising to use creativity, compassion, and a willingness to listen to the People to mend an ailing government. In 2006, Johnson was barred from practicing law in Massachusetts. "The disbarment by a kangaroo court was an effort to silence my criticism of the courts," she said, adding laughingly, "I'll have to write a series of judicial murder mysteries and kill off a judge in the prologue of every one." A newspaper wrote, "While we don't fully agree with either her politics or her methods, Johnson is a character in a humdrum world sorely in need of more characters. She's the thorn in the side, the thumbtack on the chair. . . . Johnson speaks her mind, and loudly."
