Excellent, Straight Information about Critical Issues for men and their children.By BookmanI am a divorced Dad and have gone through the Family Court system, unfortunately prior to reading this book. I have raised three children for 13 years; single-handedly and now find myself as an outsider in a custody dispute over my forth child, a 1-year-old son. I must share with anyone (women, men, dads, moms, children)

that you must read this book. It is an excellent description of what fathers and their children face in the current Family court climate. Not only describing in a very truthful and non-euphemistic manner the current issues and trends but also how we got here. One in every two men will face these issues at some point in their lives. However, most are clueless and those that are not clueless, don't seem to care. Even parents (yes, both Moms and Dads) with children who are boys, don't seem to understand just what kind of a position these boys can be in as grown men. How we got here is a sad story of misunderstandings, misbeliefs, poor science, poor deduction, and clouded views, but the fact that we are still here despite significant and continually mounting evidence, is truly a shame and one of the biggest, yet "secret" failures, of our society. If you do not read this book for yourself then read it for your son or any boy that you know will some day be a father. 20 of 23 people found the following review helpful. Children as Fodder in the Downfall of Society By A Customer In short, if you don't know the material in this book, you don't know human rights, (including children's rights, men's or father's rights, and women's rights) as it applies in contemporary western society. If you have yet to emancipate yourself from the radical feminist induced mental slavery, you may not be ready for this book. I've read several highly regarded father and children's rights books, and find this one by far the best. This book makes it apparent why the most staggering human rights violations in the history of the world are being perpetrated by the state and federal governments of the United States and the United Kingdom, in particular, against their own laws and ratified treaties with the United Nations. It is concerned with no less than government coerced self-implosion, using our precious children as fodder by dysfunctional, deviant, and self-appointed misandrists. Now I finally understand why my children's lives are being ruined and I, as their father, can do nothing to prevent it. My question as to why those sworn to uphold the law in the state of Iowa would intentionally break the law, knowingly ensuring that my children will then be subjected to neglect, and physical, emotional, and sexual abuse, has finally been answered. This book makes it clear why any attempt to protect my children is met with hostility towards me, and additional abuse being forced upon them. And the detrimental lifelong consequences to my children, and to their own descendants, are becoming quite clear. This book is for anyone truly concerned with children, men, women, our society, our descendants, or our future. Unless you find widespread, state sponsored torture and deprivation to humans desirable, I suggest you purchase and read this great work immediately, and then seriously consider taking action to prevent the downfall of western civilization. Thank you Stewart, for your great and noble work for children. 14 of 17 people found the following review helpful. It's about time. By A Customer While being in a city and state that supposedly supports "father's rights", my husband and I are terrified of what we are setting into motion next week-trying to get custody of his daughter. Despite the fact that his ex is lying about where his child support is going (luckily we have proof), her moving out of state (illegal in this state), changing his daughter's last name, refusing to let her call him "daddy" and the fact that he hasn't seen her in months (those are just the tip of the iceberg)... there is that doubt. Because she is "The Mother". It seems that unless a woman is on drugs or a mental institution (actually in a hospital, because meds, or refusal to take them, isn't enough apparently) the father is at the mercy of the mother's every bad day. So we go, to possibly spend thousands of dollars, just to make the messed up court system acknowledge a beautiful, bright, six year old girl's right to know her father, any new siblings, and her father's extended family. Maybe. And if this book seems a little "pro-man", and therefore "anti-woman", so be it. There are plenty of "empowering" books for women, why not men?

A comprehensive book with practical and theoretical information on divorce and custody, including case analysis, psychiatric literature, law and a father's guide to the courts. Important new material defining the struggle for children's human and legal rights in the aftermath of divorce and custody battles. Including material for fathers seeking shared parenting of their children

Important new material -- The Center for Children's Justice-Robert Muchnick One thing we can do is to clone Stewart Rein -- Dr. P. Quisumbing-UN Human Rights Commission From the Publisher Never before has society been faced with such a challenge-deciding what principles should guide lawmakers, parents and the courts in protecting the rights and needs of children involved in divorce and custody cases. Tens of millions of children are being deprived of their human and psychological rights to treasured relationships with male parents. Why? How can fathers fight for justice? "Betrayal of the Child", written with compassion and insight, refutes "The Best Interests of the Child" (Freud, Solnit Goldstein) single parent theology and concludes that only two parents can serve the best interests of children. From the Author I wanted to write this book from a global perspective, with special emphasis on the American and British systems of family justice as these are the key jurisdictions. My experience in the UK and the US has shown that the present covert maternal preference policies driving family courts are to the greatest extent, universal. It is also clear that these policies are causing fatherlessness on an unprecedented scale with staggering numbers of children suffering personal loss and a lifetime of dysfunction. I have written well and truly from the perspective of the child and not the parents, although much of what I have stated is directed towards fathers on the assumption that they and their children have an association of interests in present circumstances.
