From Brand: Cambridge University Press : Beyond Environmental Law: Policy Proposals for a Better Environmental Future before purchasing it in order to gauge whether or not it would be worth my time, and all praised Beyond Environmental Law: Policy Proposals for a Better Environmental Future:

2 of 2 people found the following review helpful. Interesting ideas By Arnold There are some very interesting "third generation" proposals in this book. I really like the idea of Environmental Legacy and Competition acts. I'd

recommend this book to environmentalists and policymakers looking for out-of-the-box ideas.

This book offers a vision for the third generation of environmental law designed to enhance its ability to protect our environment. The book presents two core proposals, an Environmental Legacy Act to preserve a defined environmental legacy for future generations and an Environmental Competition Statute to spark movement to new clean technologies. The first proposal would require, for the first time, that the federal government define an environmental legacy that it must preserve for future generations. The second would establish a market competition to maximize environmental protection. The balance of the book provides complimentary proposals and analysis. The first generation of environmental law sought broad protection of health and the environment in a fairly fragmented way. The second sought to enhance environmental law's efficiency through cost-benefit analysis and market mechanisms. These proposals seek to create a broader, more creative approach to solving environmental problems.

About the Author Alyson C. Flournoy is Professor and Alumni Research Scholar at the University of Florida Levin College of Law where she also serves as Director of the Environmental and Land Use Law Program. Her writing focuses on decision-making processes under environmental and natural resource laws, environmental ethics, and the intersection of science and law, and has appeared in leading journals including *Columbia Journal of Environmental Law*, *Harvard Environmental Law*, *Indiana Law Journal*, and *Texas Law*. Flournoy is also a member scholar of the Center for Progressive Reform. David M. Driesen is the 13th professor in Syracuse University's history to hold the title University Professor, the highest honor available to a faculty member at that institution. His research focuses on the law and economics of environmental law. His book, *The Economic Dynamics of Environmental Law* (2003), won a Lynton Keith Caldwell Award for the best book on environmental and technology policy. His articles have appeared in leading journals, including *Cornell Law*, *Ecology Law Quarterly*, *Harvard Environmental Law*, and the *Virginia Journal of International Law*. Driesen is also a member scholar of the Center for Progressive Reform.
