Jecker, Nancy S. Jecker, Albert R. Jonsen : Bioethics 3e: Intro History Method Pract before purchasing it in order to gage whether or not it would be worth my time, and all praised Bioethics 3e: Intro History Method Pract:

0 of 0 people found the following review helpful. Four StarsBy Betsy HallThe right book at a better price than the University's book store.1 of 1 people found the following review helpful. Five StarsBy Anna TrawczynskiGreat job! Thanks!3 of 3 people found the following review helpful. Better than most introductions! Not superficial!By EducatorThe 2nd edition is an excellent introduction to the field of bioethics, which avoids the simplicity that many

introductions show. It covers the history of the field, methods of ethics case analysis, cultural assumptions, and much more. I recommend this for advanced undergraduates, graduate/professional students, and the educated layperson who is interested in bioethical issues. The book functions well as a stand alone text for classes.

Bioethics: An Introduction to the History, Methods, and Practice, Third Edition provides readers with a modern and diverse look at bioethics while also looking back at early bioethics cases that set ethical standards in healthcare. It is well suited for advanced undergraduate and graduate students who plan to pursue careers in nursing, allied health, or medicine, as well as professionals seeking a comprehensive reference in the field. The authors retain the unique three-pronged approach, discussing the history, the methods, and the practice of bioethics. This approach provides students with a breadth of information, focusing on all sides of the issue, which will allow them to think critically about current bioethical topics. The third edition is updated throughout with new information and cases including, the latest on genetics and reproductive technology, physician-assisted suicide, as well as numerous new cases.

About the Author Lawrence J. Schneiderman, M.D., is a professor in the Department of Family and Preventive Medicine and the Department of Medicine at the School of Medicine, University of California, San Diego. Nancy S. Jecker, Ph.D., is associate professor in the Department of Medical History and Ethics, the Department of Philosophy, and the School of Law at the University of Washington, Seattle. Albert R. Jonsen is Professor of Ethics in Medicine and Chairman, Department of Medical Humanities, University of Washington School of Medicine.
