Barry Furrow, Thomas Greaney, Sandra Johnson, Timothy Jost, Robert Schwartz : Bioethics: Health Care Law and Ethics (American Casebook Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Bioethics: Health Care Law and Ethics (American Casebook Series):

0 of 0 people found the following review helpful. Great Bioethics Law BookBy Law Clerk BuyerGreat choice of a book for teaching a bioethics law school class. This book is an easy read compared to most law school books and is very interesting. Anyone trying to decide what book to use to teach bioethics or any student interested in bioethics should definitely check this book out. I only leave 4 and 5 star reviews for products that I would purchase again and recommend to friends and family.0 of 0 people found the following review helpful. but it fits my purpose and the price was great.By Ana Q.Lots of notes, but it fits my purpose and the price was great.0 of 0 people found the following

review helpful. Five StarsBy BookReaderGood book with current cases.

This book provides a rich body of materials for courses in bioethics and law. Primary legal sources, including judicial opinions, statutes, regulations and institutional policies, will give students insight into the strategies used by courts, legislatures, agencies and health care providers in addressing bioethics issues. The book also draws from interdisciplinary research in medicine, ethics, and law to provide students diverse critiques of legal and public policy issues in bioethics. Materials in this text are tightly edited and designed to create high quality and focused classroom discussion, and, the text includes classroom tested problems that will engage students more deeply on each issue. Bioethics: Health Care Law and Ethics begins with accessible introductory material on how to do ethics analysis. It then provides separate chapters on Reproduction and Birth (including current issues relating to abortion and contraception and issues related to assisted reproductive technologies); Legal, Social, and Ethical Issues in Genetics; Life and Death Decision-making; Regulation of Research Involving Human Subjects; Distributive Justice and Organ Transplantation; and Current Controversies in Public Health (including issues related to immunization practice).
