**David Crump, Eugene Gressman, David S. Day : Cases and Materials on Constitutional Law (Casebook Series)**  
before purchasing it in order to gage whether or not it would be worth my time, and all praised Cases and Materials on  
Constitutional Law (Casebook Series):

0 of 0 people found the following review helpful. Five StarsBy John StewartLots of highlighting but other than than  
it's great0 of 0 people found the following review helpful. Five StarsBy Chris MillerGreat buy!0 of 1 people found the  
following review helpful. I was sent the wrong bookBy krssouthdakotaI ordered "Cases and Materials on  
Constitutional Law" and instead received a Torts book. I was told I had to reorder it, and wouldn't get my original  
price. It was going to be \$80 more than what I originally ordered. I decided to get the book somewhere other than .

This casebook is mostly traditional in approach. It begins with judicial review, deals next with legislative and  
executive powers, and contains coverage of individual rights in the latter half. The landmark cases, from Marbury v.  
Madison to Brown v. Board of Education to Bush v. Gore and beyond, are present. Though traditional in approach,  
Cases and Materials on Constitutional Law includes many unique features to create an accessible yet stimulating  
learning experience for the student of Constitutional Law. Distinct features of this casebook include: Inclusion of  
actual litigation documents from constitutional cases; Full text of the Constitution placed at the beginning of the book  
to encourage students to read it; Prefatory chapter presenting a short history of the Constitution; Numerous problems  
based on cutting-edge issues; A brief chapter on state constitutional law; and A concise chapter on the Second

Amendment that provides an excellent opportunity for student interpretation in light of the relative scarcity of court opinions in this nevertheless socially significant area. The authors aim to make the fundamentals easy for students to grasp so that professors can devote more class time to more interesting issues. Complex chapters are introduced by text that gives students a "road map" of the issues. Cases are edited with student comprehension in mind, with explanations of difficult principles inserted in brackets.
