Daniel Farber, Jody Freeman, Ann Carlson : Cases and Materials on Environmental Law, 8th (American Casebooks) (American Casebook Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Cases and Materials on Environmental Law, 8th (American Casebooks) (American Casebook Series):

1 of 1 people found the following review helpful. Easy read for a text book By Brandon This book was recommended to me by a professor. It covers a wide variety of environmental laws and cases. Great for the beginning/casual law student. 0 of 0 people found the following review helpful. School Book By NM The product was just as we had hoped for and shipping time and price were reasonable when grouped together. We purchase enough from and it's partners

that we are able to group many items for super saver shipping. Very informative and well written. Good reference for law students. 0 of 0 people found the following review helpful. Cheap alt to new edition By Carlos Villacis Great deal. We use the newer edition in class, and I just used this one. Saved about \$150.

The Eighth Edition provides up-to-date treatment of climate change issues. This classic casebook provides students with a thorough understanding of all major federal environmental regulatory schemes as well as insight into current policy controversies. Particular attention is given to the proper role of cost-benefit analysis, the appropriate judicial role in reviewing agency decisions, and the impact of constitutional decisions relating to federalism, standing, and takings. It also covers the latest Supreme Court cases on subjects from Superfund to water pollution, as well as the major regulatory changes in the first year of the Obama Administration.
