Tom Slovenski : Cellular Forensics for First Responders (Volume 1) before purchasing it in order to gage whether or not it would be worth my time, and all praised Cellular Forensics for First Responders (Volume 1):

0 of 0 people found the following review helpful. Essential Basic Information !By Patrick AlexanderThis should be required reading for anyone concerned with the evidence that might exist on a cellular phone. It is written for the first responder, but even if you don't think you will ever be the first person to lay hands on the phone in question, you will benefit from knowing how and why it should be handled. A small investment that might pay large dividends! I highly

recommend !Patrick Alexander, Criminal Defense Investigator0 of 0 people found the following review helpful. Most TimelyBy Bill WalshAt long last there's a clear, concise guide for police officers on the problems, pitfalls, and solutions to cellphones and the Fourth Amendment. In this constantly evolving field of the law, Mr. Slovenski gives practical advice to those on the frontlines wanting to preserve valuable cellphone evidence. This book is a must-read for every law enforcement agency.0 of 0 people found the following review helpful. Cellular Forensics for First RespondersBy Bama FanThis should not be described as a book, it barely has 50 pages and that is only because a large font was used and lots of black and white photos. The "book" was overpriced as well.

A comprehensive manual for law enforcement, military, private investigators and other first responders covering the proper techniques for the protection and preliminary acquisition of digital data of a cell phone. A must-read book for all investigators! Presented in simple to understand instructions, Cellular Forensics Investigator and Instructor, Tom Slovenski, gives a step by step presentation on the "how to's" in forensically protecting a mobile phone's data. In addition, the author offers the #1 technique for retrieving data off a mobile phone as well as presenting his "S.P.E.A.R. Triage Method."

About the AuthorTom Slovenski is a 25 year police and forensic investigation veteran specializing in Mobile Phone Forensics and Data Recovery. His classes on mobile phone forensics have been attended internationally by law enforcement and military investigators. Tom is also a senior instructor with the State Departments Anti-Terrorism Assistance Program.
