Margaret Thompson, Christine Hooper, Michael Cooper, Christine M. Hooper : Child Adolescent Mental Health: Theory Practice (Hodder Arnold Publication) before purchasing it in order to gage whether or not it would be worth my time, and all praised Child Adolescent Mental Health: Theory Practice (Hodder Arnold Publication):

Child and Adolescent Mental Health is an introductory handbook ideal for any professional working with children,

adolescents and their families in the field of child and adolescent mental health. It balances clear theoretical explanation with illustrative case histories to give the text a distinct practical focus. The book covers all the core aspects of child and adolescent mental health, starting with the background to emotional and behavioural problems, looking at models and tools for assessment and treatment before examining the specific problems encountered in young children, older children and adolescents.
