Louise Humphries, Tim Gully : Child Protection for Hospital Based Practitioners before purchasing it in order to gage whether or not it would be worth my time, and all praised Child Protection for Hospital Based Practitioners:

Child abuse takes many forms: neglect, physical abuse, sexual abuse and emotional abuse. Identification is not always easy, and this is especially the case in an Accident and Emergency (AE) Department. This book, written by an inter--

agency adviser and a child protection specialist, identifies the different forms of abuse and gives clear guidance on what can be done about it.
