**From Brand: CCH Hong Kong Limited : China Outbound Investments** before purchasing it in order to gauge whether or not it would be worth my time, and all praised China Outbound Investments:

In the first half of 2010 Chinese direct outbound investments hit US\$23 billion, with seven deals over US\$ 1 billion. In fact, China's outbound investments are a hot topic around the globe. China Outbound Investments offers practical and authoritative guidance to Chinese investors and their advisors as well as to those located in actual and potential target

countries of Chinese investments around the world. China Outbound Investments provides: - a structured and precise introduction to the law and practice of China outbound investment projects, including approval and registration requirements, anti-trust law, HR issues, taxation and accounting; - a comprehensive discussion of general topics of importance in the context of cross-border investments, such as the discussion of structuring options, tax planning, outbound related IT and IP issues as the importance of investment treaty networks; - a unique compilation of over 20 country reports from law firms around the world addressing their home jurisdictions' inbound investment regimes; and - a compilation of bilingual PRC laws and regulations governing China outbound investments. China Outbound Investments is unrivalled in terms of the comprehensiveness of the areas covered in great detail and the practical approach taken by the different authors.
