Joel M. Gross, Karrie L. Stelcen : Clean Water Act (ABA Best Practice) before purchasing it in order to gage whether or not it would be worth my time, and all praised Clean Water Act (ABA Best Practice):

This is a quick, practice-focused guide to the Federal Water Pollution Control Act, commonly known as the Clean Water Act, which is the primary federal statute regulating water pollution for the protection of the countrys water

resources. Written by experienced legal practitioners, this concise guide offers lawyers, government staff, consultants, and other interested individuals with an overview of the CWAs complex framework of federal and state controls. The authors explain the statute and the 1972 Amendments that created a system of permits and regulations to govern the discharge of pollutants into the nations waters and publicly owned treatment works, focusing on these uniform standards and their implementation and enforcement. In addition to the historical background, topics include the NPDES permitting process; technology-based standards; water-quality-based effluent limitations; publicly owned treatment works (POTW); regulation of wetlands; discharges of oil and other hazardous substances; wet-weather discharges from point sources; reducing nonpoint source pollution; and enforcement.

About the Author Joel M. Gross is a Partner in Arnold Porter's Washington, DC office, and a member of the environmental practice group. Previously, he worked for 17 years in the Environmental Enforcement Section of the Department of Justice, where he was heavily involved in some of the most significant environmental litigation of the 1980s and 1990s. As Chief of the Environmental Enforcement Section, he was involved in setting and implementing the federal government's environmental enforcement policies and priorities. Karrie L. Stelcen is an associate in the New York, NY, office of Arnold Porter LLP, and is a member of the firm's Environmental Practice Group. As part of her practice, Ms. Stelcen counsels clients on numerous Clean Water Act matters, including permitting and enforcement issues.
