Clients and Lawyers: Securing the Rights of Disabled Persons by Susan M. Olson

"Olson's thesis is that recent social policy litigation has been more decentralized and has featured greater client participation than was true a generation ago.... She observes that this new style of litigation is often found along with nonjudicial forms of political action and is more likely to be successful when a finite remedy rather than a broad statement of constitutional principle is sought. Olson concludes by suggesting that women's rights groups could profit by using these methods. Recommended for academic libraries."-Library Journal
