**John D. Zelezny : Communications Law: Liberties, Restraints, and the Modern Media (with InfoTrac)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Communications Law: Liberties, Restraints, and the Modern Media (with InfoTrac):

0 of 0 people found the following review helpful. almost like a new oneBy Man YangThe book almost like a new one. I got the book on time, very fast. The book be kept very well. And the price also worthy to buy.

The new edition of COMMUNICATIONS LAW continues with the reviewer-praised readability, coverage of core topics, and currency that have been its consistent strengths. The author's hypothetical exercises have been a favorite among both professors and students. As in previous editions, the Fourth Edition includes a thorough update of cases to keep the text current.

"...Two years ago I switched to Zelezny's text because I found it to be more approachable for undergraduate students. Zelezny does not attempt to cover too much material in any given chapter. The most important cases and issues are strongly emphasized, without the law school catch-all approach used in fatter textbooks. The examples and case studies are relevant to student journalists, and the chapter summaries and questions are very useful in helping students to focus on key points." "After experimentation with a number of texts for this particular student audience, I have settled on Zelezny because compared to the competition, I find it the most clear and comprehensible for students. Zelezny goes much further in trying to make sure the material is clear than is generally seen in textbooks in this area. Another strength of the book is that it is fairly wide-ranging; it is the only book of which I'm aware, for example, that includes attention to the increasingly important area of media risks to the public." "I adopted Communications Law because it breaks down legal issues so undergraduates can understand them. It is also comprehensive. It is intelligently written but not overwhelming for the undergraduate reader. It is also more affordable than most law texts. Key boxes and bullet points make the text easier to navigate and highlight important principles." About the Author John D. Zelezny, an attorney and senior public relations executive, has extensive experience in both academia and the professional world of communications. His varied career began as a small-town newspaper reporter in the 1970s, later encompassed 15 years as a professor of media law and journalism at three West Coast universities, and eventually led to his employment as a corporate executive and strategic communications adviser to CEOs and boards of directors. He is a member of the State Bar of California, and currently serves as senior vice president and chief communications officer for Community Medical Centers in Fresno, Calif. He is a frequent lecturer on communications law and the author of complex First Amendment problems for law-school advocacy competitions. Mr. Zelezny holds degrees from Humboldt State University and the University of the Pacific's McGeorge School of Law.
