**Yun Ma : Conservation and Recreation in Protected Areas: A Comparative Legal Analysis of Environmental Conflict Resolution in the United States and China (The Rule of Law in China and Comparative Perspectives)**

before purchasing it in order to gauge whether or not it would be worth my time, and all praised *Conservation and Recreation in Protected Areas: A Comparative Legal Analysis of Environmental Conflict Resolution in the United States and China (The Rule of Law in China and Comparative Perspectives)*:

This book provides a comprehensive and up to date comparative study of the management and resolution of conflicts between conservation and recreation in protected areas in the US and China. Competing claims on the use of nature, increasing regulation of land use and recreational activities, and the conflicting goals between conservation and development have led to a rise in conflicts in the designation and management of protected areas. How to effectively manage and resolve these conflicts has become a challenge for both legislators and managers. By adopting an institutional dimension in legal interpretation, this book critically examines how such conflicts are dealt with in the legal regimes of the US and China while exploring interactions between legislatures, agencies and courts. The book searches for a plausible solution to improve the legal framework of protected areas in China by emulating pertinent mechanisms developed in the US, whilst also presenting legal and policy recommendations to the US. This informative book will be useful for legal scholars in Chinese law, nature conservation law, administrative law and comparative law.

'Yun Ma's fascinating book examines how China and the United States manage national parks and other protected areas. The study of China is especially important because the various classes of protected areas there are relatively new and little understood. Her account of traveling to southwestern China to visit Pudacuo National Park, the country's first, demonstrates how even local officials often know far less about such protected areas than we would expect.' John C. Nagle, University of Notre Dame, USA 'This important comparative study of how US and Chinese legal institutions address national park recreation controversies offers valuable insights into the role law, politics, and economics play in shaping each nation's nature conservation policies, while providing a realistic assessment of the many challenges park managers face in both countries.' Robert B. Keiter, University of Utah, USA and author of *To Conserve Unimpaired: The Evolution of the National Park Idea* About the Author Yun Ma is a lecturer in administrative law at the Law School of China University of Political Science and Law (CUPL), Beijing, China. She graduated cum laude from the Law School of CUPL with the bachelors degree in law, and obtained a free pass to the master studies in constitutional and administrative law at CUPL. Funded by the China Scholarship Council, she worked as a PhD candidate at the Department of Constitutional and Administrative Law and Erasmus China Law Center at the Erasmus School of Law since September 2011 and obtained her doctoral degree in 2015. She worked as a visiting researcher at Maurer School of Law of Indiana University and S.J. Quinney College of Law of University of Utah in the United States between September 2013 and February 2014. Her research interests include administrative law, natural resources law and environmental governance. She has authored and co-authored articles and book chapters on administrative litigation, private land conservation, national parks and other topics.
