From Hart Publishing : Constructive and Resulting Trusts before purchasing it in order to gage whether or not it would be worth my time, and all praised Constructive and Resulting Trusts:

Constructive and resulting trusts have a long history in English law, and the law which governs them continues to develop as they are pressed into service to perform a wide variety of different functions, for example: to support the working of express trusts and other fiduciary relationships, to allocate family property rights, and to undo the

consequences of commercial fraud. However, while their conceptual flexibility makes them enormously useful, it also makes them hard to understand. In the 12 essays collected in this volume, contributors shed new light on various aspects of the law governing constructive and resulting trusts, revisiting current controversies, bringing new historical material to the fore, and offering new theoretical perspectives.

The collection of essays is a significant and important contribution in this area. John Tarrant *The Journal of Business Law* Issue 8, 2010 This collection of essays from an impressive range of experts is an important recent contribution to the debate. Many of the chapters in this volume will incite further debate, and none of them can be accused on simply rehearsing old arguments. The book is an invaluable resource for scholars, graduate students and able undergraduates. Brian Sloan *The Cambridge Law Journal* Volume 69, Part 3, November 2010 The contribution this book makes to the law concerning constructive and resulting trusts is immense. The twelve essays challenge our preconceived ideas of these trusts by suggesting - often radically - new perspectives on how we should analyse the law...this book will prove to be a most rewarding read for those to whom the controversies of the law of trusts is appealing. Ting Khai Liew *Trust Law International* 24(3), 2010 About the Author Charles Mitchell is a Fellow and Tutor in Law at Jesus College, Oxford, and a Professor of Law at the University of Oxford.
